

CMPE 109- Fundamentals of Computing

Assignment 1: Ethics

2019-2020 FALL SEMESTER

THIS IS A GROUP ASSIGNMENT (MAX 2 STUDENTS!)

Deadline: October 13, 2019 Sunday 23:55

1. Define the term “Software Piracy”.
2. What are the benefits of using licensed software?
3. What are the risks and consequences of using pirated software?
4. Consider “*General Ethical Principles*” defined by The ACM Code of Ethics (which can be found at: <https://www.acm.org/code-of-ethics>). Write the name of the principle which do you think is violated by the consequences of the software piracy.

IMPORTANT NOTES:

- The assignment shall include front page (Please check the sample title page document). This is a group assignment and one submission is enough for each group, but do not forget to write the names of the group members on the title page.
- Give proper references where it is required.
- Cheating will NOT be tolerated. Special software will be used to verify if the submitted homework is your original work or copied from someone/somewhere else. If any case of cheating is detected, you will get **ZERO** from your homeworks.
- You should upload your homework file to the Moodle system before the deadline. Late homeworks will NOT be graded.
